INTRODUCTION TO MEME COIN

Memecoin ("MEME") is a digital token compatible with the ERC-20 token standard. MEME has no functions, no utility and no intrinsic value, no promise or expectation of any financial return, profit, interest or dividend.

There is no roadmap and there is no promise or expectation that any ecosystem will even be developed for MEME.

WHAT IS DOGWIFHAT?

For the avoidance of doubt, and without limiting the generality of the above, **MEME is not, and is not intended to:**

- be a medium of exchange accepted by the public (or a section of the public) as payment for goods or services or for the discharge of a debt;
- be designed or intended to be used by any person as payment for any goods or services, whether through the Memeland Group or otherwise;
- entitle holders to exchange MEME for goods or services;
- be a representation of money (including e-money);
